ABOUT US

Jenny Sales & Services is a premier provider of advanced security and automation solutions, dedicated to delivering innovative, reliable, and customized systems. Established in Surat, we have built a strong reputation for excellence in the security and automation industry. Our focus is on meeting the unique needs of residential, commercial, and industrial clients, offering cutting-edge technology to ensure safety, efficiency, and convenience.

Our team of highly trained professionals is committed to providing seamless integration, installation, and maintenance of various security systems. We take pride in our ability to create a smart and secure lifestyle for our clients, ensuring peace of mind through state-of-the-art solutions. With a customer-centric approach, we aim to exceed expectations by delivering high-quality services tailored to individual requirements.

At Jenny Sales & Services, we believe in staying ahead of the curve by adopting the latest technologies and industry best practices. Our dedication to innovation and quality has made us a trusted partner for clients seeking reliable security and automation solutions.

VISION & MISSION

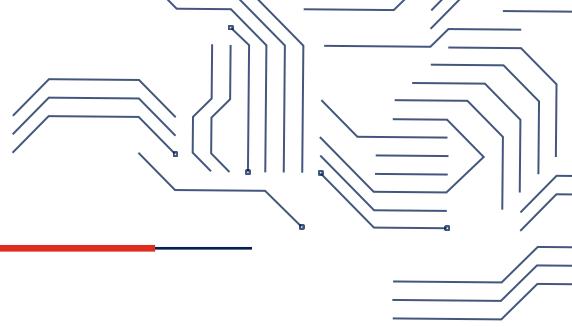

VISION

Our vision is to become a trusted name in smart and secure solutions, recognized for our innovation, reliability, and customer satisfaction across India. We aspire to set the benchmark in the security and automation industry by consistently delivering cutting-edge solutions that enhance safety and convenience.

MISSION

Our mission is to deliver top-notch services that ensure safety, efficiency, and customer satisfaction. We are committed to empowering our clients with the best in security and automation technology, providing customized solutions that meet their specific needs. By fostering a culture

OUR SERVICES

Jenny Sales & Services offers a comprehensive range of security and automation solutions designed to cater to diverse needs. Our services include:

CCTV SYSTEM

We provide high-quality surveillance systems for real-time monitoring and recording. Our CCTV solutions are designed to enhance security by providing clear, reliable footage for both residential and commercial properties. We use advanced cameras with features like night vision, motion detection, and remote access to ensure comprehensive coverage.

TIME ATTENDANCE SYSTEM

Our time attendance systems enable efficient tracking of employee attendance, helping businesses streamline their operations. These systems are equipped with biometric technology, such as fingerprint and facial recognition, to ensure accurate and secure attendance recording.

ACCESS CONTROL SYSTEM

We offer secure entry systems to restrict unauthorized access to premises. Our access control solutions include biometric readers, keycard systems, and smart locks, providing robust security for offices, factories, and residential complexes.

SECURITY ALARM SYSTEM

Our advanced security alarm systems detect and alert against potential threats, such as intrusions or emergencies. These systems are designed to provide instant notifications, ensuring quick response times to mitigate risks.

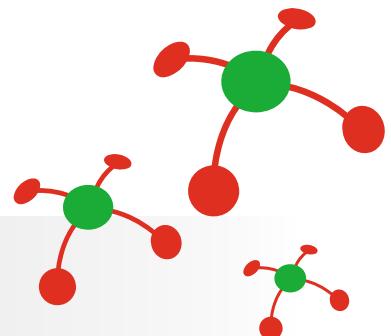

HOME AUTOMATION

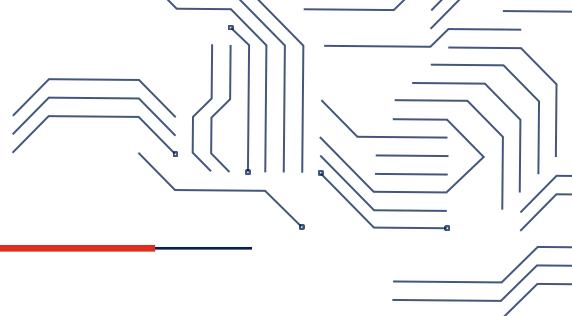

We specialize in smart home solutions that bring convenience and efficiency to your lifestyle. Our home automation systems allow you to control lighting, appliances, security devices, and more through a single interface, enhancing comfort and energy efficiency.

BUILDING MANAGEMENT SYSTEMS

Building Management Systems (BMS) are centralized platforms that monitor and control a building's mechanical and electrical systems such as HVAC, lighting, power, and security. They improve energy efficiency, occupant comfort, and operational performance through automation and real-time data monitoring.

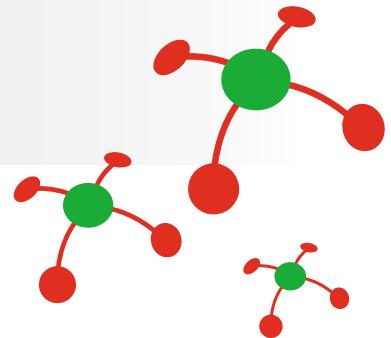

DISPLAY SOLUTIONS SYSTEMS

Display Solutions Systems provide advanced visual communication through LED walls, digital signages, video walls, and interactive displays. These systems are used for information sharing, advertising, monitoring, and control room applications across commercial, industrial, and public spaces.

INTEGRATED COMMAND AND CONTROL CENTRE

Integrated Command and Control Centre (ICCC) is a centralized hub that aggregates real-time data from CCTV, IoT sensors, emergency services, and city or facility subsystems. By providing a unified dashboard, advanced analytics, and two-way communication channels, it enables quick situational awareness, coordinated decision-making, and rapid response to incidents across security, traffic, utilities, and public safety domains.

FIRE ALARM SYSTEMS

Fire Alarm Systems are critical safety solutions designed to detect smoke, heat, or fire and alert occupants through audible and visual alarms. These systems enable early warning and timely evacuation, minimizing risk to life and property in residential, commercial, and industrial environments.

PA, CONFERENCING & PRO AUDIO SYSTEMS

PA, Conferencing & Pro Audio Systems deliver clear and reliable sound for communication, presentations, and events in various environments. They include public address systems, audio conferencing setups, and professional-grade sound equipment to ensure high-quality audio coverage for meetings, auditoriums, and large venues.

PARKING MANAGEMENT SYSTEMS

Parking Management Systems are automated solutions that streamline vehicle entry, exit, and payment processes in parking areas. They enhance security, optimize space utilization, and improve user convenience through technologies like ANPR, RFID, ticketing, and mobile apps.

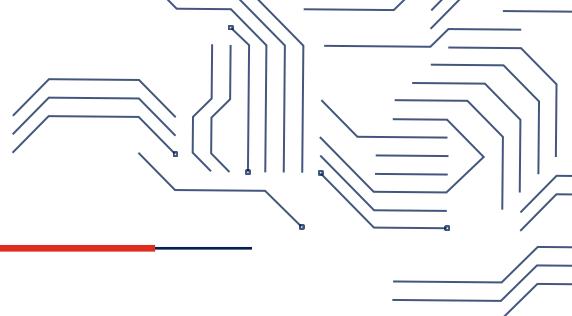

BOOM BARRIER SYSTEMS

Boom Barrier Systems are automated gate control solutions used to regulate vehicle access at entry and exit points. Commonly deployed in parking lots, toll plazas, and secured premises, they offer enhanced security and traffic management through integration with access control systems like RFID, ANPR, or remote operation.

VIDEO MANAGEMENT SOFTWARE

Video Management Software (VMS) is a centralized platform that enables the recording, storage, and real-time monitoring of video from multiple CCTV cameras. It offers advanced features like video analytics, motion detection, playback, and integration with other security systems for effective surveillance and incident management.

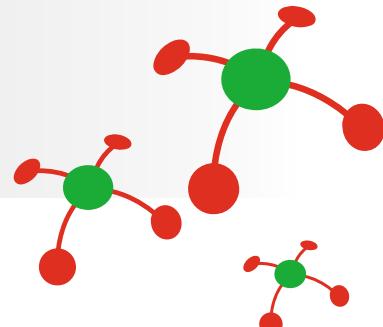

ACTIVE & PASSIVE NETWORKING

Active & Passive Networking for Data, Voice, and Video involves the complete setup of network infrastructure to ensure seamless communication and connectivity. Passive components include structured cabling, racks, and patch panels, while active components like switches, routers, and firewalls manage and transmit data, voice, and video efficiently across the network.

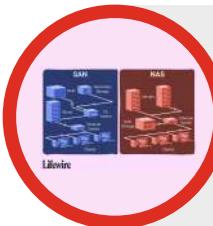

DATA CENTRE SOLUTIONS

Comprehensive infrastructure and management services that ensure high availability, scalability, and security of data center operations. These solutions support computing, storage, and networking needs for enterprise IT environments.

FIREWALL SOLUTIONS

Security systems designed to monitor and control incoming and outgoing network traffic based on predefined security rules, protecting networks from unauthorized access and cyber threats.

STORAGE SOLUTIONS: SAN, NAS

SAN (Storage Area Network) and NAS (Network Attached Storage) provide scalable, high-performance storage options; SAN offers block-level storage for mission-critical applications, while NAS provides file-level storage accessible over a network for easy data sharing.

WIRELESS RADIO REMOTE CONTROL FOR EOT CRANE

Wireless Radio Remote Control for EOT Crane allows operators to control Electric Overhead Traveling (EOT) cranes remotely, enhancing safety and mobility. It ensures precise load handling, reduces operator fatigue, and improves efficiency in industrial and warehouse environments.

EOT CRANE ACCESSORIES

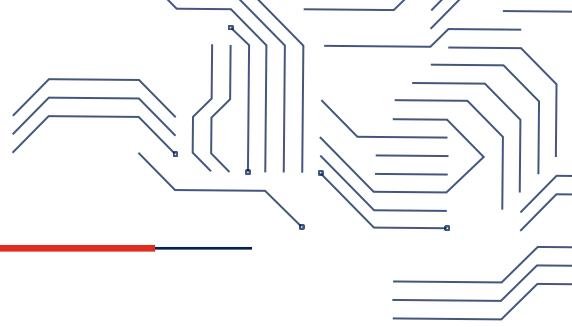

We offer a complete range of accessories for EOT (Electric Overhead Traveling) cranes to enhance performance, safety, and ease of operation. Our products include wireless radio remote controls, limit switches, anti-collision systems, load indicators, DSL systems (current collectors), buffers, and cable trolleys. Each component is engineered for durability and compatibility with standard crane systems. These accessories help improve operational efficiency, reduce downtime, and ensure safe material handling in industrial environments. Custom solutions are also available based on client requirements.

VIDEO DOOR PHONE SYSTEM

A video door phone system offers secure, two-way audio and video communication between residents and visitors. It enhances safety by allowing users to see and speak to visitors before granting access. Ideal for homes, apartments, and offices.

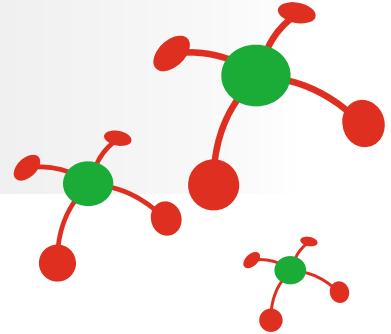

INDUSTRIAL LIFT SOLUTIONS

We provide reliable industrial lift systems tailored for warehouses, factories, and commercial buildings—ensuring smooth material handling with high safety and efficiency standards.

COMPREHENSIVE AMC

Our Comprehensive Annual Maintenance Contract covers complete maintenance of low voltage systems such as CCTV, fire alarms, PA systems, access control, and networking. It includes preventive service visits, fault repairs, and free replacement of faulty components, ensuring hassle-free and uninterrupted system performance.

NON COMPREHENSIVE AMC

In our Non-Comprehensive AMC, we provide regular maintenance and technical support for all low voltage systems. While service visits and troubleshooting are included, any replacement parts or major repairs are charged separately—offering a cost-effective solution for ongoing system upkeep.

LIFT CONTROL PANEL SOLUTIONS

Our custom-built lift control panels are designed for seamless integration, offering precision control, durability, and compliance with industrial safety norms.

GAS SUPPRESSION SYSTEM

We offer advanced gas suppression systems designed to protect critical equipment and data centers by swiftly extinguishing fires without damaging sensitive electronics, ensuring minimal downtime and maximum safety.

FIRE HYDRANT & SPRINKLER SYSTEM

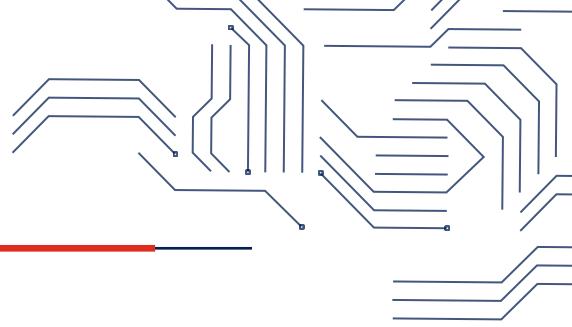

We provide robust fire hydrant and sprinkler systems designed for rapid fire response, ensuring property and personnel safety through reliable water-based fire suppression in industrial and commercial environments.

EPABX AND INTERCOM SYSTEM

EPABX (Electronic Private Automatic Branch Exchange) and Intercom systems enable internal and external voice communication within an organization. They help streamline communication between departments, reduce call costs, and enhance overall coordination and productivity.

WHY CHOOSE US

At Jenny Sales & Services, we are committed to delivering exceptional value to our clients. Here's why you should choose us:

• COMPREHENSIVE SUPPORT:

We provide end-to-end support, from consultation and installation to maintenance and troubleshooting.

01

• ADVANCED TECHNOLOGIES:

We use the latest technologies that meet the highest industry standards, ensuring reliable and efficient solutions.

• CUSTOMIZED SOLUTIONS:

Our services are tailored to meet the specific needs of each client, ensuring optimal performance and satisfaction.

03

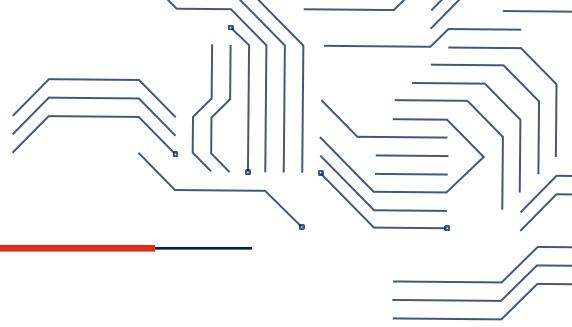

• DEDICATED TEAM:

Our team of experts is highly trained and experienced, ensuring seamless execution of projects.

05

• PROMPT SERVICE DELIVERY:

We prioritize timely delivery and quick response to client needs, minimizing downtime and disruptions.

KEY PROJECTS

Jenny Sales & Services has successfully completed numerous projects, showcasing our capability to deliver tailored solutions. Below are some of our notable projects:

PROJECT 1

SUMILON GROUP OF INDUSTRIES

We have successfully executed major infrastructure and security system installations across the Sumilon Group of Industries, including Saj Industries Pvt. Ltd., Sumilon Industries Pvt. Ltd., and Sumilon Polyester Pvt. Ltd. Our work involved the installation of over 500 CCTV cameras, 250+ telephone lines, P2P devices, and complete networking solutions at multiple branch locations such as Gandhidham, Surat, Kim, Kosamba, and Pipodara. This project enhanced the group's surveillance, communication, and IT infrastructure across all sites.

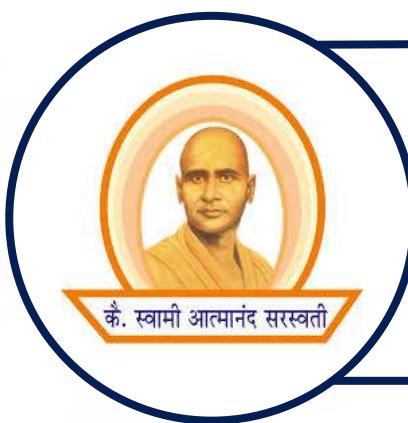

PROJECT 2

S K WEAVING PRIVATE LIMITED

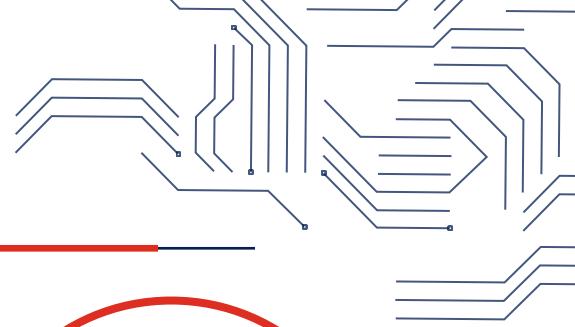

I have extensive experience in the installation and configuration of security and communication systems. I have successfully installed and commissioned over 150 CCTV camera systems, along with telephone systems, public address (PA) systems, and fire alarm systems across various sites. Notably, I played a key role in setting up the complete security and communication infrastructure for S K Weaving Private Limited, including the inter-branch connectivity across more than 4 locations. This involved establishing secure network links between branches, ensuring seamless communication, and centralized monitoring of all installed systems. My work ensured improved coordination, enhanced safety, and efficient management across all branches. I take pride in delivering reliable, standards-compliant installations tailored to meet the specific operational needs of each site.

PROJECT 3

CCTV INSTALLATION AT SHRI SWAMI ATAMANAND SARASWATI AYURVEDIC SAHKARI PHARMACY LTD

We successfully completed the installation of 100+ CCTV cameras across multiple branches and the Head Office of Shri Swami Atamanand Saraswati Ayurvedic Sahkari Pharmacy Ltd. The project covered key locations including Surat (Head Office), Ahmedabad, Bardoli, Vadodara, Navagam and Bharuch. This installation ensures enhanced surveillance, security, and centralized monitoring across all branches, contributing to a safer and more efficient operational environment.

PROJECT 4

HIMALAYA GROUP OF COMPANIES

We have successfully installed 250+ CCTV cameras, EPABX systems, and P2P devices across multiple sites of the Himalaya Group of Companies, including Royalex Himalaya Inx Pvt. Ltd, Himalaya Industries Pvt. Ltd, and Royal Inx Industries Pvt. Ltd. Our solutions enhance their site security, communication infrastructure, and remote connectivity.

PROJECT 5

HARIKRISHNA GROUP

We proudly serve the Harikrishna Group by delivering essential ELV and safety systems across their companies, including Harikrishna Exports, Dholakia Technologies, and CarbonX Technology. Our services include rodent repellent, access control, and fire alarm systems, ensuring secure, safe, and efficient operations throughout their facilities.

PROJECT 6

DE BEERS GROUP

We are executing a specialized project at De Beers Group, delivering efficient LED lighting solutions and automated door systems to improve operational functionality and energy efficiency. Alongside, we are providing comprehensive AMC support for their CCTV surveillance and Access Control Systems, ensuring consistent uptime and secure access management. Our team is committed to high-quality implementation, timely service, and maintaining the safety infrastructure in line with De Beers' operational standards.

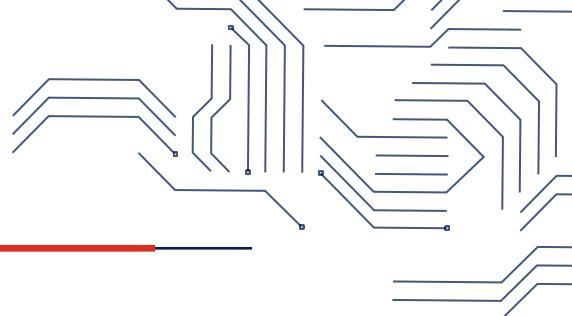

PROJECT 7

CONVERGINT INDIA PVT. LTD

We are proudly associated with Convergint India Pvt. Ltd, through which we have successfully executed multiple projects for leading MNCs including Google, Oracle, Lubrizol, and Amazon. Our scope of work spans CCTV surveillance, access control systems, networking, and other low-voltage solutions, delivered with precision and reliability. By working with global brands, we bring international standards, technical expertise, and seamless execution to every project. Our commitment lies in supporting mission-critical infrastructure with trusted service and long-term support.

CLIENT TESTIMONIALS

Our clients satisfaction is our top priority. Heres what some of them have to say:

SUMILON GROUP OF INDUSTRIES

"Jenny Sales & Services transformed our security system with their CCTV and access control solutions. We feel much safer now!"

MR. ALOK JARIWALA

HIMALAYA GROUP OF COMPANIES

"We appreciate the excellent networking, EPABX and CCTV installation – the system is stable, high-quality, and has greatly improved our security and connectivity."

MR. BHARAT BUHA

S K WEAVING PRIVATE LIMITED

"We're extremely satisfied with the prompt and reliable fire alarm system service – timely support and flawless installation ensured complete safety for our facility."

MR. JASPAL SINGH BAWEJA

FUTURE GOALS

Jenny Sales & Services is committed to continuous growth and innovation. Our future goals include:

04

Enhancing our training programs to upskill our team in emerging technologies.

03

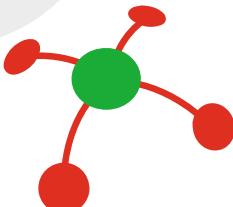

Partnering with more global brands to bring the latest technology to our clients.

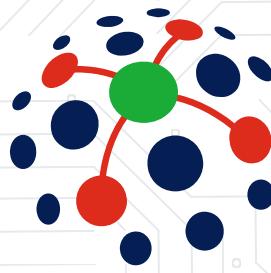

02

Introducing AI-based security solutions for enhanced monitoring and analytics.

01

Expanding our presence to other cities in Gujarat and beyond.
